

**Date posted:** June 1, 2026

**Pay:** From \$17.13 per hour

**Job description:**

Behavioral Technicians focus on working with children, teens and adults with autism spectrum disorder (ASD). Behavior Technicians assist Behavioral Analysts in implementing and monitoring plans that help individuals build skills in coping, communication, socialization, self-help and play. The role involves helping individuals with day-to-day activities and recording their progress.

Behavioral Technicians work one-on-one or with a small group in various settings, such as the individuals home, community or learning center.

Behavioral Technicians receive training to become Registered Behavioral Technicians (RBT) that uses science-based therapy called applied behavioral analysis (ABA). RBT work under the supervision of a Board Certified Behavioral Analyst.

**Core Duties and Responsibilities:**

- Follow behavioral health plans developed by a BCBA
- Assist individuals in day-to-day tasks
- Observe behaviors to collect data
- Teach specific skills required for skill obtainment
- Nurture social abilities
- Participate in meetings
- CPR/First Aid (training provided)
- Documentation of services provided
- Complete 40 hours of Behavioral Training (training provided) to become registered
- Successfully pass the RBT exam
- Follow the RBT Ethics Code
- Annual training (provided)

**Requirements:**

- Must be at least 18 years old
- High School diploma or equivalent
- Driver's License: Successfully pass driving record review
- Background check: Criminal and LEIE (Medicaid Provider Check)
- Drug Screening
- Able to successfully complete RBT 40 hour training and become registered within 30 days of hire. (Paid training provided)
